

Empower Breakthrough Health Outcomes, Today.

Capability Statement

IHRC, Inc. is a woman-owned small business established in 2007. Science is in our DNA, as our founders and key executives have more than 80 years of combined experience in public health, science and research, population health, data analytics, and other areas. We offer services to clients that include the federal government, state governments, the private sector, and other organizations both domestically and internationally. We work in partnership with our clients to fulfill their short and long-term goals, and we strive to be responsive to their needs in ever-changing environments. Our organizational capabilities enable us to manage small- and large-scale projects, from one staff to a 150-plus member team, with the same efficiency and attention that ensures high-quality project results. Our Largest Client is the U.S. Centers for Disease Control and Prevention.

Core Capabilities
