IHRC offers Management Consulting services in numerous disciplines nationally and internationally. We leverage our expertise in science, information management, population health, program and project management, our extensive experience, and our network of subject matter experts to effectively address our Clients’ most important questions.

IHRC, Inc. is an international consulting and professional services corporation, and a minority woman-owned small business founded in 2007. We provide scientific, information management, management consulting, bioinformatics analytical support, bioinformatics workforce development training and administrative program management support to a wide range of public and private organizations and we strive to exceed our Clients’ expectations. Our Largest Client is the U.S. Centers for Disease Control and Prevention.
